YASH CHAUDHARI

Aspiring Data Scientist / Data Analyst

Pune, India | +91-9022814603 | yashchaudhari372@gmail.com | LinkedIn | GitHub

SUMMARY

Aspiring Data Scientist and Data Analyst with hands-on experience in Python, SQL, Power BI, Machine Learning, NLP, and Predictive Analytics. Skilled in Data Cleaning, EDA, Feature Engineering, Statistical Analysis, and Data Visualization, with experience developing and deploying end-to-end ML projects using Flask. Proficient in transforming complex datasets into actionable business insights, interactive dashboards, and data-driven solutions to support strategic decision-making. Looking for an entry-level Data Scientist / Data Analyst role.

SKILLS

Programming: Python, SQL

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow, PyTorch, Matplotlib, Seaborn, NLTK, spaCy

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Deep Learning: Artificial Neural Networks (ANN), CNN, RNN, LSTM, GRU, Encoder Decoder

Natural Language Processing: Text Preprocessing, Tokenization, Word Embeddings, Named Entity Recognition, Sentiment Analysis

Computer Vision: Image Classification, Image Annotation, Object Detection, YOLO, OpenCV, Image Segmentation

Data Visualization & BI: Power BI, DAX, Power BI Service, Tableau, Excel

Databases & Tools: MySQL, Fast API, Git, GitHub, Jupyter Notebook, VS Code, CICD, Render, AWS EC2, Vercel, Streamlit

Core Concepts: Statistics Analysis, EDA, Data Cleaning, Data Visualization, Feature Engineering, Data Modeling, Data Labeling

INTERNSHIP EXPERIENCE

Data Science Intern | Hisan Lab Pvt. Ltd. **Jun 2026 – Present**

- Analyzed and preprocessed structured datasets using Python, Pandas, NumPy, and SQL, improving data quality through cleaning, handling missing values, and feature engineering.
- Developed classification models using Scikit-learn and XGBoost, achieving up to 89% accuracy and a 0.98 weighted F1-score on machine learning projects.
- Built regression models using Random Forest, achieving an R^2 score of 95.67% for vehicle price prediction through feature engineering and model optimization.
- Designed interactive Power BI dashboards and data visualizations to monitor KPIs, identify trends, and support data-driven decision-making.

PROJECTS

Sentiment Analysis (NLP) – Deployed via Flask | Python, NLP, Flask, Scikit-learn

- Built an end-to-end NLP sentiment classification pipeline using text preprocessing and machine learning, achieving 85% accuracy and 0.85 F1-score on 10,000 test samples. Handled class imbalance and tuned hyperparameters via GridSearchCV to improve recall on default cases by 12%.
- Deployed a Flask-based web application for real-time sentiment prediction from unstructured text data.

Loan Approval Prediction System – Deployed via Flask | Python, XGBoost, Flask, Scikit-learn

- Developed an end-to-end XGBoost classification model using data preprocessing and feature engineering, achieving 98% accuracy and 0.98 weighted F1-score on 854 test samples. Compared Naive Bayes and SVM classifiers, selecting the best model based on F1-score (0.81) for imbalanced sentiment classes.
- Deployed the trained model using Flask, enabling real-time loan approval predictions through an interactive web application.

Vehicle Price Prediction System – Developed using Random Forest | Python, Random Forest, Scikit-learn

- Developed a Random Forest regression model using data preprocessing and feature engineering, achieving an R^2 score of 95.67% for vehicle price prediction.
- Applied exploratory data analysis (EDA), predictive modeling, and model evaluation to estimate vehicle prices based on vehicle specifications.

EDUCATION

B.Tech. in Electronics & Telecommunication Engineering (ENTC) | *DBATU, Lonere* **2023 – 2026**

CERTIFICATIONS

- Data Science and Machine Learning Certificate – YBI Foundation
- Learn complete python in simple way – Udemy
